Patient Participation Group

# PPG Overview

*Wolseley Medical Centre*

Patient participation groups were developed as a way to extend patient involvement.

It encourages people to engage with the NHS at the same time as engaging in their own health care.

Carried out once a year and will act as representatives to the rest of the practice population, to discuss the results of a recent Patient Survey

A chance to influence the development of local health services and give suggestions on what the PPG could do in the future

What you think should be our key priorities when it comes to looking at the services we provide to you and others in the practice

# Practice Survey

*Wolseley Medical Centre*

- We gave out 300 questionnaires to patients of both sexes, wide age brackets and various ethnicities.

These were patients that were attending the surgery either for an appointment, to collect a prescription or just popping in with a query

- We gave out the questionnaires at various different points during the practice surgery times. This ensured that we covered a wide section of the Practice population.

We checked our pre-booked surgery lists to ensure that we could give out questionnaires to those of all ethnic origins, ages and sex etc.

# Survey Results

•The three areas of positive and negative that stand out from the completed survey
